

bp trading & shipping is one of the world's leading energy marketing, operations, and trading teams.

We connect energy producers, suppliers, markets, and customers to keep energy flowing today and help build out tomorrow's energy system.

Melita Kyriakou

Low carbon fuels
regulation manager

I have 18 years of experience designing, implementing, and managing complex biofuels compliance systems across multiple divisions.

I have an extensive understanding of the entire biomass-based diesel supply chain from feedstocks to credits generation.

Mine is a commercial role in T&S Americas to identify and optimize opportunities in the low carbon economy from a regulatory and voluntary compliance perspective.

My current/former accreditations include Lead Auditor under: ISO 14001, CA/OR LCFS, ISCC EU/PLUS, Canada CFR + MBA.

And, not or. While bp is mostly in oil and gas today, we've increased global investment in our lower carbon, convenience stores, and power trading businesses (our "transition growth engines") from around 3% in 2019 to around 23% in 2023.
