

ISCC Regional Stakeholder Meeting

Overcoming Key Challenges on the Way of Scaling up SAF

Andrea Ayala - Senior Manager – Decarbonization

- Aviation value chain
- Collaborative policy approach
- Corporate SAF sustainability trends
- SAF operations

3%

of global greenhouse gas (GHG) emissions come from aviation

98%

of United's GHG emissions come from jet fuel

Today:

United's footprint is 51M metric tons CO₂e

2035:

50% carbon intensity reduction compared to 2019

2050:

Net Zero GHG emissions
