ISCC EUDR Add-On

With over 10 years of experience in sustainable, traceable and deforestation-free supply chains, ISCC provides a robust solution to support system users in their EUDR obligations.

In collaboration with GRAS (Global Risk Assessment Services), we developed an EUDR Add-on that combines the audit process together with a technical tool, EUDRx, that is tailor-made to the requirements of the legislation.

ISCC Provides Support to Comply with EUDR Requirements

ISCC supports companies by developing an EUDR Add-On with the following components:

Information Collection & Deforestation Analysis

- Collection of product information and geolocation data
- Conduct deforestation analysis based on remote sensing data
- Assessment on legality: tailor-made questionnaire regarding legality; assessment of relevant documentation during audit.

Risk Assessment & Risk Mitigation

- Consideration of all relevant environmental and human rights criteria of the EUDR
- Identification of high risk hot spots
- Risk mitigation

Digital Traceability Platform

- Transmission of relevant information along the supply chain via digital traceability platforms
- Option to export for due diligence statement and upload to EC information system

A One-Stop-Shop for Your EUDR Requirements

Agricultural and Forest Biomass supply chain

Farms/Plantation → First Gathering Point → Processing Unit → Operator/Trader in EU → Market

A One-Stop-Shop for Your EUDR Requirements

For First Gathering Points:

- Collection of product information and geolocation data

- Conduct deforestation analysis based on remote sensing data

- Assessment on legality during audit

- Consideration of all relevant environmental and human rights criteria of the EUDR

For Intermediaries:

- Transmission of relevant information along the whole supply chain via digital traceability platforms

- Risk assessment and deforestation-check of incoming material

For Operators & Traders

- Risk assessment and deforestation-check of incoming material

- Consolidated reporting for due diligence statement

- Required information including risk assessment for due diligence statement (DDS) is provided

What Are the Advantages of Using ISCC EUDR Add-On?

- Third-party on-site audits support traceability and assurance of deforestation and legal requirements

- Tailor-made EUDR GRAS/ISCC tool provides deforestation check and risk assessment

- Digital traceability platform provides transmission of relevant information along supply chain and consolidated reporting for DDS

| Deforestation-free check | Legality check | Traceability | On-site audits | Provision of necessary data for DDS |
